

Brian Sánchez

WEB DEVELOPER

About me

I am a student of Information and Communication Technology Engineering. Throughout this career, I have realized that programming is by far the area of study that I am most passionate about and interested in.

Experience

Web developer

DuoSeptem. | Oct 2022 - Currently

My experience is focused on the creation, consumption, and modification of microservices for building scalable websites, with a particular emphasis on ERP and e-commerce projects. I use technologies such as Laravel, PHP, and MySQL on the backend. On the frontend, I work with Angular, TypeScript, SCSS, and Angular Material. Additionally, I utilize tools like GitHub, Postman, and Azure DevOps for development management.

Education

Information and communication technology engineering

Instituto Tecnológico de Culiacán | January 2019 - July 2024
